

AQUAEXCEL

AQUAculture infrastructures for EXCELlence in European Fish
research

Work Package 2. Infrastructure mapping, strategic planning and sustainability

WP2 will describe the resources (infrastructure, expertises, biological material) of the partner infrastructures, and make this available internally and externally through the internet portal developed in WP5. It will also analyze research needs expressed in SRAs by establishing interactions with other projects/platforms (especially EATIP) and evaluate how infrastructures will match with them. It will then derive plans for promoting a more sustainable cooperation among the existing infrastructures.
